

# Make Your Own Baking Powder

*If you make your own baking powder, you will always know there are no harmful chemicals in it, and save some money! Plus you can always make sure it is fresh before using it by putting it in a little water to see if it still fizzes.*

## Ingredients:

1 part baking soda

1 part arrowroot powder\*

2 part cream of Tartar

## Instructions:

Combine all ingredients in an air-tight jar and shake very well before using.

*\*You may use non-GMO cornstarch in place of the arrowroot powder.*
